

SSL/TLS тесты

How to check your secure connection

In order to check your mail server connectivity over SSL/TLS, the online checkers listed below can be used.

You need to specify the server hostname and port number or an existing email account and run the test.

SSL-Tools: <https://ssl-tools.net/mailservers>

CheckTLS: <https://www.checktls.com/index.html>

MXToolbox: <https://mxtoolbox.com/diagnostic.aspx>

High-Tech Bridge: <https://www.htbridge.com/ssl>
