

openvpn посмотреть кто сейчас подключен

Через openvpn-status.log:

```
# cat openvpn-status.log | grep 10.8.*
10.8.0.18,tst-svm-web,94.4.21.11:1194,Sat Jun 8 10:01:02 2019
10.8.0.10,note-tst,192.168.1.1:35510,Sat Jun 8 10:01:22 2019
```

Через консоль (предварительно прописав строку в server.conf)

```
# echo "management localhost 7505" >> /etc/openvpn/server.conf
# systemctl restart openvpn@server
# systemctl status openvpn@server
```

и соединившись по telnet/nc:

```
# telnet 127.1 7505
status
